Properties of Equality		Properties of Congruence
Addition Property Subtraction Property Division Property Multiplication Property Distributive Property	Substitution Property Reflexive Property Symmetric Property Transitive Property	Reflexive Property Symmetric Property Transitive Property
Definitions		
Definition of Congruence	$AB = BC \Leftrightarrow \overline{AB} \cong \overline{BC}$	
Definition of Bisects	Divides a segment or angle into two congruent parts.	
Defintion of Midpoint	Divides a segment into two congruent segments	
Definition of Complementary Angles	Complementary \Leftrightarrow Sum 90°	
Definition fo Supplementary Angles	Supplementary \Leftrightarrow Sum 180°	
Definition fo Perpendicular	Perpendicular lines intersect at right angles.	
Definition of a Right Angle	A right angle = 90°	
Postulates		
Angle Addition Postulate		$m\angle ABD + m\angle DBC = \angle ABC$
Segment Addition Postulate		$AB + BC = AC$
Linear Pair Postulate	If two angles form a linear pair, then they are supplementary.	
Theorems		
Vertical Angle Theorem	If two angles are vertical, then they are congruent.	
All Right Angles Theorem	All right angles are congruent.
